Economics is the study of how societies produce and exchange goods and services to satisfy material needs. In the economics program, students examine the sources of economic growth—how societies produce more of what they need. Undergraduates may study economics as part of a broad interest in the social sciences to develop specialized skills useful in today's complex labor market. The major in economics is also a good foundation for graduate studies in advanced economics, public policy, law, or business.

Macroeconomics, which focuses on the overall economy, deals with such problems as inflation, unemployment, growth and instability, economic development, and governmental monetary and fiscal policies.

Microeconomics examines the economic behavior of individuals, households, firms, industries, and trade among countries. It seeks to assess the economic effects of market power and environmental damage and analyzes the economic aspects of natural resources, poverty, health, income distribution, trade unions, and government regulation.

Courses in economics cover international trade; the behavior of families, firms, and industries in the market economy; the environmental costs of growth; and the economic aspects of

natural resources, poverty, health, labor market discrimination, trade unions, and governmental oversight. International and comparative perspectives are emphasized, most directly in courses in economic development of the developing world and economic history.

Graduates may find jobs in major corporations, financial institutions, or federal, state, and local governments. Their work may involve planning and forecasting, assessing labor needs, and undertaking financial studies. They may estimate consumer demand for new products, conduct research, teach, or provide specialized consulting services. See pages 313–317 for course descriptions.

The mission of the Northeastern University School of Education is to prepare community-dedicated educators who foster the academic achievement and personal success of children and youth in diverse urban settings. To carry out this mission, the School of Education provides programs of study in which classroom course work is integrated with field experiences and in which candidates must demonstrate their understanding of course content through instructional performance. Field placements provide candidates the opportunity to work with Boston Public School students, teachers, and parents in a variety of school and community settings and to link education theory with experience in the classroom.

During the first year of the program, as part of ED U111, Education in the Community, students are placed in one of our partner community agencies to serve as tutors and volunteers helping young people succeed in their education. During each subsequent year, students spend extended periods of time in public schools in Boston.

Our undergraduate programs prepare elementary and secondary teachers who understand their subject area and who have the ability to connect with and educate children in diverse urban communities. Every School of Education student has a major in the College of Arts and Sciences. Students have options in their education program of study. Students can pursue a minor in elementary or secondary education, a minor plus Massachusetts Department of Education endorsement for licensure (minor plus student teaching), or select a combined bachelor's plus Master of Arts in Teaching program. The combined bachelor's plus Master of Arts in Teaching is an intensive program for qualified students that includes a year-long internship in schools in the fourth year of the five-year program.

Undergraduate students who want to become teachers need to be admitted formally to the School of Education. Prior to admission, students may enroll in ED U111 and ED U504, the first two courses in the licensure sequence.

To qualify for admission to the School of Education, students must:

- Successfully complete ED U111 including the 30-hour community field placement.
- Be enrolled in an appropriate major in the College of Arts and Sciences. For a minor in elementary education, all Arts and Sciences majors are acceptable except for human services and American Sign Language. (These majors do not match the Department of Education requirements.) For a minor in secondary education, the following majors meet our Department of Education program approval: math, all science, English, Spanish, French, history, and political science.
- Complete an application packet that includes a reflective paper from ED U111, a personal statement, a transcript that shows a GPA of approximately 2.750 or higher, and a signature from the student's major adviser.
- Interview with a member of the Admissions Committee, which consists of faculty, staff, and community partners.

See pages 317–319 for course descriptions.

Note: See the School of Education's Title II Report Card online at www.education.neu.edu.

The department offers courses in American and British literature; creative, expository, and technical writing; linguistics; rhetoric; and literary studies.

Students who have completed the freshman English requirement and are in good academic standing may major or minor in English. The broad-based major requires proficiency in a number of approaches—including historical, generic, and theoretical—to the study of language and literature. The more narrowly focused minor gives students intensive exposure to literature, writing, linguistics, or technical communication.

English majors prepare for careers in teaching and research, advertising and publishing, radio and television—any field in which communication and critical judgment go hand in hand. The department also offers an intellectual and cultural framework for preprofessional students in law, medicine, business, engineering, or computer science. See pages 322–331 for course descriptions.
